AI Solutions Engineer – Generative AI, Azure Cloud, and Enterprise Automation

Professional Summary

Ph.D. computer scientist and CISSP with 10+ years in software engineering, applied AI/ML, and cloud security. Designs, builds, and deploys GenAI/LLM-powered solutions and automation workflows; Microsoft Azure certified (AZ-900, AI-900). Authored a practitioner guide on Generative AI with Amazon Bedrock and shipped production automation and integration tooling at Oracle and Philips, pairing engineering depth with security, governance, and clear technical documentation.

Technical Skills

- **Applied AI / GenAI:** LLM and Generative AI solutions, RAG architectures, AI agents and workflow automation, Amazon Bedrock, prompt and model integration via APIs (Claude, OpenAI)
- **Cloud:** Microsoft Azure (AZ-900, AI-900), Azure Sentinel, AWS, virtualization, REST API integration
- **Engineering:** Python, C#, C++, Java, SQL, Bash; automation and CI/CD (Jenkins, GitLab, TFS, Travis); MS SQL Server, MongoDB
- **Security & Governance:** CISSP; access controls, DLP, Responsible AI, compliance; system design, architecture diagrams, and technical documentation

Professional Experience

Bowie State University

Lecturer and Researcher

2024 - Present

Maryland, USA

- Build and teach applied AI, generative AI, and secure-systems curricula; prototype LLM-grounded tools and automation for instruction and research.
- Authored a practitioner guide, Generative AI with Amazon Bedrock, covering enterprise GenAI design and deployment patterns.

Stevens Institute of Technology

Graduate Research and Teaching Assistant

2020 - 2024

New Jersey, USA

- Engineered Python data and security-analytics pipelines and machine-learning models, including the open-source Chiku library.
- Designed end-to-end architectures for privacy-preserving analytics and documented them for technical and research stakeholders.

Oracle

Senior Applications Engineer

2018 - 2019

India

- Built and integrated enterprise ERP workflows using C++, SQL, and REST APIs, validating identity and access controls across backend services.

Philips

Senior Software Engineer

2015 - 2018

India

- Created an automation toolchain that reduced manual test effort by over 50% and deployed version control for 300 GB binary assets per release.
- Led teams of four and mentored interns, aligning engineering with global best practices in a regulated, compliance-driven environment.

Education \& Certifications

- **Ph.D., Computer Science** — Stevens Institute of Technology, Hoboken, NJ (2024). GPA 3.59/4.0
- **M.Tech., Computer Science** — Nirma Institute of Technology, India (2016). GPA 8.21/10
- **B.E., Computer Science** — Gandhinagar Institute of Technology, India (2013). GPA 7.52/10
- **Certifications:** (ISC)² CISSP and CC; Microsoft Azure AZ-900 and AI-900; IBM Watson Analytics

Selected Accomplishments

- Microsoft Azure **AZ-900** and **AI-900** certified; CISSP and (ISC)² CC certified.
- Authored **Generative AI with Amazon Bedrock** and released open-source software (Chiku, VaultBox) on GitHub.
- Published 14+ peer-reviewed papers on AI, cryptography, and security; IEEE Senior Member.
- First Prize, Red Team CTF 2022 (Trend Micro and ISACA NY Metro); strong written and verbal stakeholder communication.
